

Onapsis Threat Intel Center

# One-Click Access To Critical ERP Security News

## Keep Up with the Latest Threat Campaigns and Quickly Understand Your Exposure

---

While cybercrime targeting ERP systems is escalating and threatening business continuity, the cybersecurity skills shortage is only getting worse. New vulnerabilities are constantly being discovered, and threat actors are increasingly exploiting older, unpatched ERP vulnerabilities, leaving resource-constrained teams struggling to keep up and understand where to focus efforts.

The Onapsis Threat Intel Center alleviates the knowledge burden placed on already-strained security teams by educating your teams on the evolving ERP threat landscape with research and insights straight from the experts at the Onapsis Research Labs. This consolidated view provides everything you need to know about high-impact threat campaigns in one place, including detailed explanation of the risk, which of your systems are affected, data from the Onapsis Threat Intelligence Cloud, as well as threat activity observations, insights, and recommendations from the Onapsis Research Labs.
